SUMMARY

Full-stack software engineer with hands-on experience building REST APIs and production web applications using React and Node.js. Reduced UI error rates by over 40% while engineering a Donor Management System handling 1,000+ records during OJT at Knowledge Channel Foundation, Inc. Cum Laude graduate (GWA 1.33) with strong backend fundamentals, a fast learning ability, and a track record of independently delivering client projects end-to-end, from React/Node.js sites to a Next.js + Laravel queuing system.

EXPERIENCE

Freelance — Web Developer

April 2021 – June 2026

- Designed, built, and deployed 5+ websites for individual clients and small businesses, using HTML, CSS, JavaScript, React, and WordPress based on project scope and budget.
- Built and deployed backend systems and RESTful APIs for 4 client projects since 2024 using Node.js, Express.js, and PostgreSQL, MySQL, and MongoDB to power dynamic, data-driven functionality.
- Developed a queue management system for a client (2023) using Next.js on the frontend and Laravel for the backend/API, enabling real-time turn tracking and reducing manual wait-time coordination.
- Owned the full project lifecycle independently — requirements gathering, mockups, development, testing, and deployment — working directly with non-technical clients.
- Maintained and updated live client sites, resolving bugs and shipping feature updates while ensuring consistent uptime and performance.

IT Intern / OJT Trainee — Knowledge Channel Foundation, Inc.

Feb 2026 – May 2026

Resource Mobilization Department — Donor Management System

- Engineered a web-based Donor Management System using React, Vite, and Tailwind CSS, managing 1,000+ donor records across 3 core modules.
- Developed and integrated 8+ REST API endpoints supporting real-time donor data retrieval, record updates, and reporting.
- Resolved 15+ reported UI bugs through unit testing and debugging under Agile practices, reducing error rate by over 40% before final deployment.
- Authored technical documentation and progress reports across 3 system modules, streamlining handoff and supporting the full SDLC.

PROJECTS

EduVerso — AI-Enhanced Voice-Interactive Microlearning App

Capstone, AY 2025 – 2026

- Directed backend API integration and led a 5-person team across 4 development sprints, delivering a cross-platform mobile learning app that achieved 100% positive usability feedback from evaluators.
- Designed and implemented 5+ interactive UI screens in Figma and FlutterFlow, featuring AI-enhanced microlearning, voice interaction, peer feedback, and gamified missions.
- Executed functional and usability testing across 10+ test cases per sprint, catching and resolving defects before each milestone.

EDUCATION

La Consolacion University Philippines — B.S. in Information Technology

2022 - 2026

Malolos City, Bulacan

- General Weighted Average (GWA): 1.33 — Graduated Cum Laude

SKILLS

Frontend: React, Next.js, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Figma (UI/UX)

Backend: Node.js, Express.js, Python, Laravel, Java, Kotlin, C#, C++, .NET, REST API, GraphQL, FastAPI, PHP

Database: PostgreSQL, MongoDB, MySQL, Redis, Prisma, SQL

DevOps & Tools: Git/GitHub, Docker, Kubernetes, AWS, Nginx, Linux, Vercel, Postman, CI/CD

Practices: Agile/Scrum, SDLC, Unit Testing

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco, 2025
- IT Specialist: Device Configuration and Management — Certiport, 2025
- Microsoft Office Specialist: Access Expert (Office 2019) — Microsoft, 2025
- Microsoft Office Specialist: Excel Associate (Office 2019) — Microsoft, 2023
