SUMMARY

Software Engineer with hands-on experience in backend development, REST API design, and full-stack web applications using Node.js, SQL, React, and Tailwind CSS. Contributed to a Donor Management System during OJT at Knowledge Channel Foundation, Inc. Seeking a backend or full-stack engineer role to build scalable APIs and data-driven systems.

EXPERIENCE

IT Intern / OJT Trainee – Knowledge Channel Foundation, Inc.

Feb 2026 – May 2026

Resource Mobilization Department — Donor Management System

- Built a web-based Donor Management System using React, Vite, and Tailwind CSS, managing 1,000+ donor records across 3 core modules for the Resource Mobilization team.
 - Developed and integrated 8+ REST API endpoints to support real-time donor data retrieval, record updates, and reporting.
 - Implemented unit testing and debugging procedures following Agile development practices, resolving 15+ reported UI bugs and reducing error rate by over 40% before final deployment.
 - Produced technical documentation and progress reports for 3 core system modules, supporting the full software development lifecycle (SDLC).
-

PROJECTS

EduVerso – AI-enhanced Voice Interactive Microlearning App | *Capstone Project*

- Developed a cross-platform mobile learning application featuring AI-enhanced microlearning, voice interaction, peer feedback, and gamified missions for student users.
 - Designed and implemented 5+ interactive UI screens using Figma and FlutterFlow, achieving positive usability feedback from 100% of evaluators during class demo and testing.
 - Led backend API integration and coordinated 4 development sprints within a 5-person team, covering end-to-end planning, development, testing, and documentation.
-

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

La Consolacion University Philippines, Malolos City, Bulacan

SKILLS

- Programming languages: Python, JavaScript, Node.js, SQL, Java, C#
 - Backend development: Node.js, Express.js, REST API development, MySQL, PostgreSQL, XAMPP, object-oriented programming
 - DevOps & tools: Docker, Git/GitHub, Vercel, Railway, Firebase, Postman, version control, CI/CD pipelines
 - Methodology & practices: Agile/Scrum, software development lifecycle (SDLC), unit testing
 - Frontend & design: React, Tailwind CSS, HTML, CSS, Figma (UI/UX)
 - Productivity suites: Microsoft 365, Google Workspace
-

CERTIFICATIONS

- Microsoft Office Specialist: Excel Associate (Office 2019) – Microsoft, 2023
- Microsoft Office Specialist: Microsoft Access Expert (Office 2019) – Microsoft, 2025
- Introduction to Cybersecurity – Cisco, 2025
- IT Specialist: Device Configuration and Management – Certiport, 2025
